

Shree Venus Energy System Pvt. Ltd

We manufacture MS Ducts from 0.6 mm to 5 mm Thickness. We have an expertise to support designing of your requirement or work with you existing drawings starting from design to material selection. We Manufacture MS Ducts using the state of the Robots from ABB, by which we shall be able to manufacture welded ducts of lower thickness.

Materials:

- Mild Steel
- Stainless Steel
- Galvanized
- Carbon Steel

Painting / Coating Options available:

- Red-Oxide / Black Paint
- Enamel Paint
- Epoxy Paint
- Fire Rated Paint
- Fire – Retardant Paint

Welding Facilities available:

- MIG
- TIG
- Purge

We also manufacture Welded Hoods for Fume Exhaust Systems using an automatic positioner by which the lead time required shall be very low with no compromise to quality. As we are committed to provide quality solutions and products to our customers.

For the manufacture of welded hoods use twin pulse automated robotic welding power sources, by which we shall be able have a continuous welding even on lower thickness.

Quality Inspection shall be done at all stages of the manufacturing process by team using the necessary equipment.

- Thickness
- Coating Thickness of Paints
- Welding Penetration
